PATHOLOGY REPORT

Clinical Information.	Ruptured tubal pregnancy.
Nature of specimen.	Salpingectomy

GROSS:

Fallopian tube measured 5x2 cm, with hemorrhagic cut section.

MICROSCOPIC:

Fallopian tube shows fragments of degenerated decidua with immature edematous chorionic villi and associated severe interstitial hemorrhage. No evidence of fetal tissues. No evidence of tumors.

DIAGNOSIS:

Fallopian tube, Excision:

- Ectopic tubal gestation.
- Negative for tumors.
