## PATHOLOGY REPORT

Clinical Information.	Rectal polyp.
Nature of specimen.	Rectal polypectomy

### GROSS:

Polyp measures 1.2x1 cm.

### MICROSCOPIC:

Polyp is composed of cystic mucous glands with separating stroma showing dense infiltration by neutrophils, lymphocytes and plasma cells. There is focal ulceration of covering epithelium. No evidence of malignancy.

### DIAGNOSIS:

#### Rectum, endoscopic polypectomy:

- Juvenile inflammatory polyp.
- Negative for malignancy.

### Pathologist

Prof. Dr. Neveen Tahoun, MD, PhD
